

# L748 LARGE LED DISPLAY

*LED Display which can be clearly read at 5m*

INTERCALL 700  
ADDRESSABLE NURSECALL SYSTEM

The **INTERCALL 748** LED Display is ideal for where calls need to be easily and clearly seen by staff on the move. It may be used in several applications including hospitals, doctors surgeries and larger nursing homes. Call information is very clearly displayed on the illuminated 16 character display. There is an integral alarm unit, which can be used to alert attention and may be disabled when not required. To avoid confusion, the display can be configured to show a standing message or appear "off" when no calls are active on the system.

The unit is compatible with **INTERCALL 600** and **INTERCALL 700** protocols and shows the same text as the LCD display units. The unit can either operate as the only type of display on the system or can be used in conjunction with the standard LCD units.

Operation of the unit is similar to the standard LCD units, with all calls numbered in queue order. Emergency and Attack calls are "flashed" on the display to show the higher priority while normal, assistance and priority calls are stored in memory but not displayed until the higher priority calls are dealt with. The display can be easily read at a glance as shown in the photograph below taken at a recent exhibition.

All in all, the L748 is a very useful addition to the Intercall range of products as it may be used in nurse call, staff protection, doctor's surgery or simply informative application.

#### **Technical Specification:**

The unit measures: Width 910mm x Height 950mm x Depth 60mm. The unit is supplied with a mounting bracket, which is secured to the wall first and the display is then mounted to the bracket for straightforward installation and maintenance purposes.

The unit requires a mains 90 to 240Volt AC/DC supply which is connected via a three pin connector located on one end of the unit. The unit also requires a Intercall Network connection which is again made via plug in connector on the end of the unit.

The individual characters measure Height 60mm x Width 40mm and have red illumination only.
